LUXURY ONE PIECE POOLS
BY AQUA PLATINUM

Swimming Pool Mosaics

Dive into a world of luxury with ONE by Aqua Platinum

Welcome to ONE by Aqua Platinum. We design, manufacture and install luxurious, customisable ONE-piece tiled swimming pools that transform your outdoor or indoor space. Drawing inspiration from Aqua Platinum's rich heritage of award-winning swimming pools, we can create the perfect pool to enhance your lifestyle.

Our industry-leading expertise in luxury tiled ONE-piece swimming pool design and manufacturing means that you can choose from a huge range of customisable options. From the shape, size and finishes, to the addition of luxurious features, we create your pool to your exact specifications. Whether you are seeking a pool for family fun, for serious exercise and resistance training, or as a luxury retreat with bespoke massage stations for added relaxation, we will bring your vision to life.

From concept to completion

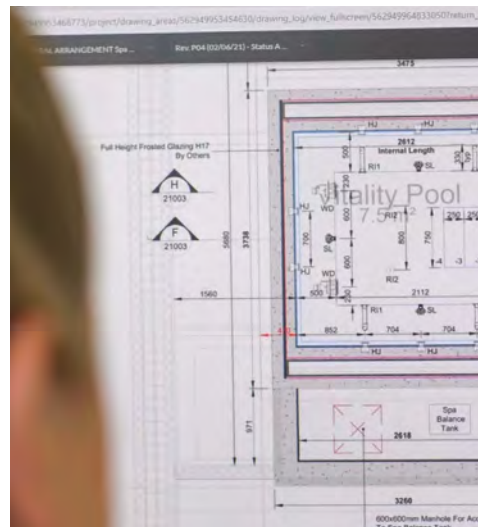

We are the only company in the UK that offers a comprehensive one-stop service for swimming pool design, manufacture, haulage, craning, installation, commissioning, and maintenance. With ONE by Aqua Platinum, you can sit back and relax as our experts handle every aspect of the process with professionalism and efficiency.

Our dedicated team ensures you experience a seamless journey from the moment you embark on the vision for your dream swimming pool, all the way through to delivery and installation.

Seamless installation

Made to fit precisely within your chosen area, our one-piece luxury tiled pools are assembled off-site then delivered and installed at your location. That means minimal disruption to your landscaping and garden. In addition, one-piece pools are simpler and easier to install than other types of pools, leading to lower overall third-party construction costs. One-piece swimming pool construction is often more efficient and faster than different types of pools too, which means less time on site is required to build it, especially if it's an outdoor swimming pool.

Our focus is on making your ordering and installation journey as simple and smooth as possible by working closely with our in-house team of 50 and our supply chain partners so that our service matches the quality of the market-leading swimming pools that we install. You can feel safe in the knowledge that your one-piece swimming pool installation is handled by trusted and highly knowledgeable professionals, who will provide you with clear communication and updates every step of the way.

Why does my pool look blue?

Look at a glass of water and it is clear and colourless. And yet the water in pools and the sea appear to be shades of blue. Why?

It's all about the light. Sunlight is a spectrum of colours, through the rainbow from red to violet. When the light hits an object, some of the colours will be absorbed and some scattered. For example, an apple looks red because it absorbs all the other colours in the light and scatters only red. Water absorbs different wavelengths of sunlight to different degrees, with the longest wavelengths with the lowest energy being absorbed first. Red is the quickest to be absorbed, then orange then yellow. The blue end of the spectrum travels further through water before being absorbed. The colours disappear underwater in the same order.

The sea seems to be blue because it absorbs all the other colours and only the blue light is scattered or reflected. A glass of water is too small an amount for the reflection of the blue light to be obvious, but when you fill a white bath with water you will see a blue tint. Clean water always appears blue, and deeper water appears more deeply blue as more of the other colours of the spectrum are absorbed.

At what depth underwater do colours disappear?

Red 4.6m
Orange 7.6m
Yellow 10.7m – 13.7m
Green 21.3m – 22.8m

Why choose mosaics from One by Aqua Platinum?

Jointpoint® mosaics are exclusive to us and provide the following advantages;

No mesh to fail. The patented 'no mesh backing' Jointpoint® system offers up to 95% of the surface area available for adhesive application – resulting in a stronger bond and superior grip

TCNA ANSI A137.2-2012 approved. Thermal Shock Resistance of Glass Tile

European Quality. Designed and manufactured in Europe to the highest standards

Personalised Print. Bespoke digital printing is available for unique creations

100% Recycled Glass. 'ISO 14021 Product Environmental Certified' recycled glass. We just add the colours and the jointing system

Foot Friendly. With a gentle pillowed edge and our non-abrasive Safe Step® slip resistant options available, comfort is key! The soft edges also allow the mosaic sheets to easily follow curves

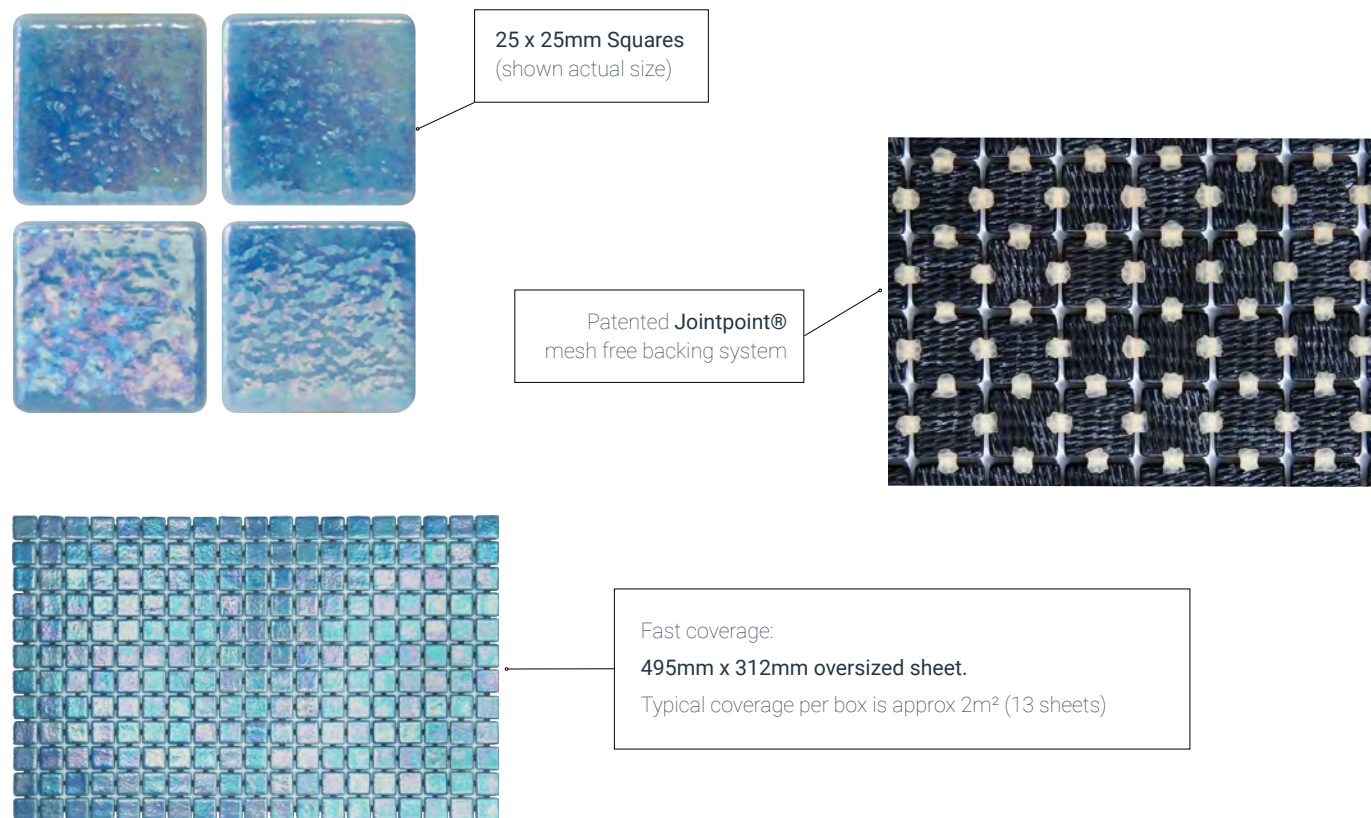

Perfectly Co-ordinated. We offer matching internal and external pieces for corners and step edges

Waterline Ready. Beautiful and easy to clean, our mosaics are a practical option

25% Faster to Install. Easy to handle, manipulate and cut; our mosaic sheets cover fast due to a 495mm x 312mm oversized format.

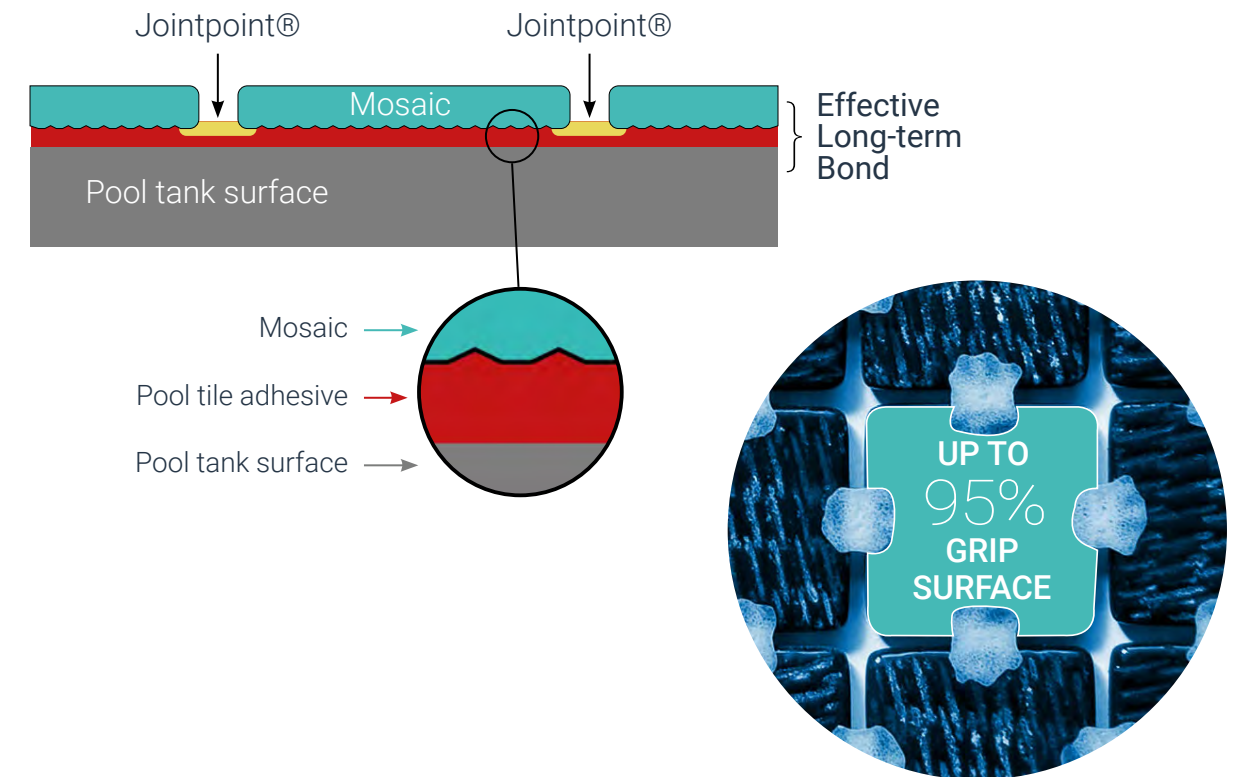

Waterline Ready. Beautiful and easy to clean, our mosaics are a practical option

Stable in all conditions. Jointpoint® does not expand or contract like mesh or paper backed systems

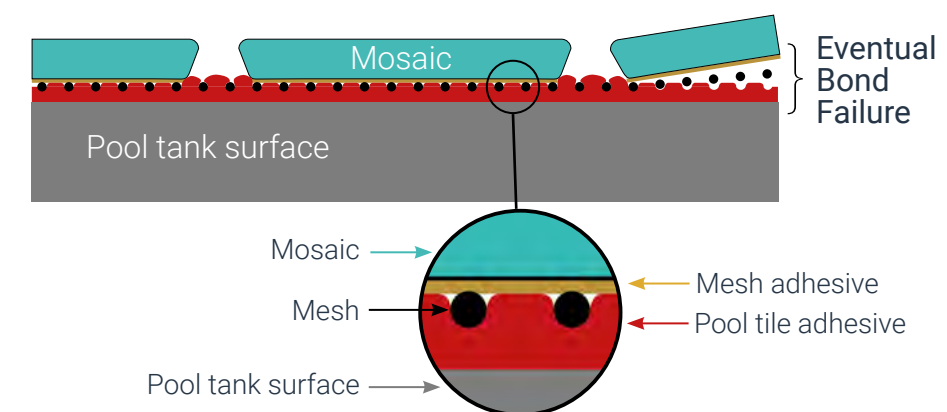

Ultimate Pool Mosaics

With up to 95% of the mosaic sheet's 'grip surface' available, there's nothing to come between the tiles and the tile adhesive. Better contact and less complexity = greater adhesion.

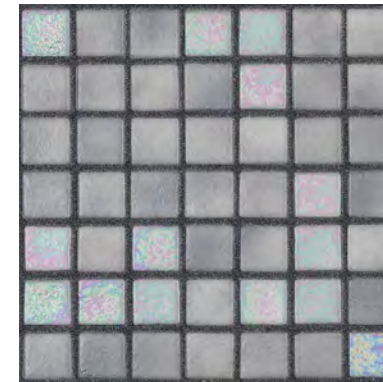

Typical mesh-backed mosaics

Mesh and mesh-adhesives act as a barrier to proper bonding between the mosaics and the pool tank surface. Air pockets trapped around the mesh weaken grip and can allow water ingress.

◀ The page opposite shows Shimmer Grey pre and post completion

Shimmer - Grey

These unique custom blends offer the best of both worlds, by mixing the high-end glamour of our iridescent mosaics with the softer tones of the Niebla range for beautiful results and excellent value.
